

SUSTAINABILITY

What we're already doing today for you and for our environment

Do you expect environmentally conscious partners with sustainable products and an understanding of social standards along the supply chain? Today, we already offer you the following:

- ✓ **Resource-saving solutions** by smart material reduction while retaining product features
- ✓ **Recycling solutions**, featuring products with an extra high recyclate content (up to 100 %), based on both post-industrial recyclate (PIR) and post-consumer recyclate (PCR)
- ✓ Responsibility along the supply chain, realized by **BSCI (Business Social Compliance Initiative)** audits, which are based on the **UN Human Rights Charter** and international labour standards (**ILO**).

What you can expect from us in the future:

Concepts for implementing the circular economy with and for our partners.
