POLIFLEXX IS A TRADEMARK OF

# LET'S START WRAPPING!

### The new generation of hand stretch films

More than 10 percent of all hand films are discarded due to damage. We've put a stop to that!

**POLIFLEXX** has reinforced edges and is wrapped softly to provide perfect protection even if handled with less care.

**POLIFLEXX** with real 300 running metres is available in a film width of 450 mm and 500 mm. It's the latest development to substitute standard hand films in thickness ranging from 17 to 23 µm.

Gain time and energy by using **POLIFLEXX**!

#### Indestructible

due to the special winding and new reinforced edges

#### Maximum load-unit stability

due to high-performance resins

#### Reinforced edges

reduced film-breaks and superior tear resistance

#### Approved for direct food contact

Compliant with 10/2011/EC

#### String-Effect

for superior load stability

#### Stretchable

even with little effort

#### Environmentally friendly

due to reduced material usage

#### Time saving

thanks to a lower constriction of the film width

#### Cost saving

less expensive than standard hand films

#### Excellent Barcode readability

due to maximum transparency

#### Easy handling

thanks to a low reel-weight
