EXCELLENCE IN FILMS

TECHNICAL FILMS

Technical films are used e.g. as laminating films, in the production of food or animal feed packaging. They can be found in packaging in the pharmaceuticals and medical industry, or as the basis for labels in the cosmetics or cleaning agent industry. As carrier films for coating, technical films are the carrier material for adhesive in protection films, and are used in the automotive industry amongst other things.

Sealant films
Label films
Carrier films

Thickness: 25 – 200 microns Width: 500 – 2,600 mm

STRETCH FILMS

Stretch films provide the optimum solution for every application, by forming safe and stable loading units for transport. In combination with sheet film, stretch films offer all round protection from moisture, humidity, dust, UV rays and even theft when dyed.

Machine films cast / blown
Manual films cast / blown
Manual films, pre-stretched, cast / blown
Narrow-width stretch film rolls
Stretch adhesive tape

Thickness: 8 – 70 microns Width: 40 – 2,000 mm

Cover sheet films, perforated and continuous

Thickness: 20 – 80 microns Width: 800 – 3,400 mm

PACKAGING FILMS

Packaging films protect all types of goods from moisture and dirt, while also ensuring reliable individual protection during transport, for various sectors.

Beverage packaging
Hygiene article packaging
Insulation packaging
Dust & dirt protection
Despatch packaging
Transport packaging
Non-woven lamination films
Cargo films
Stretch banding films
Drawstring films

Thickness: 7 – 200 microns Width: 80 – 6,000 mm

AGRICULTURAL FILMS

Agricultural films offer individual solutions, to ensure the optimal recovery of the harvest and higher yield. They also fulfil the highest standard of protection in the ensilaging process, and amongst other things are used in driving silos, or for the production of baled silage.

Silo films
Underlay films
Side wall films
Agricultural stretch films
Mulching films
Asparagus films
Ground cover films
Greenhouse films
Peat films

Thickness: 20 – 200 microns Width: 500 – 18,000 mm

CONSTRUCTION FILMS

Construction films for applications in the construction industry. The spectrum ranges from regenerated film for construction sites to high-quality film for roof substructure, for reliable insulation and a high standard of housing quality.

Construction films
Vapour barrier films

Thickness: 30 – 500 microns Width: 1,000 – 12,000 mm

ASSAMBLING FILMS

Assambling films provide reliable protection against contamination, dust or odours, and have almost unlimited possibilities in the private do-it-yourself or the communal disposal sector.

Drawstring sacks
Rubbish bags & sacks
Cover sheets
Drop cloths
Slit films
Paint protection hoods

Thickness: 5,5 – 160 microns Width: 500 – 5,100 mm
